

## Enterprise Web for Personal Windows users

Timeless Time & Expense Personal data files may be imported into Timeless Time & Expense Enterprise Windows. However, because each data file contains its own task hierarchy it is not practical to import and consolidate many Timeless Time & Expense Personal data files. For that reason, if you have many data files, we recommend starting clean or only importing one file. Install Timeless Time & Expense Enterprise Web using one of the available database options. Open the Timeless web application in your browser and complete the setup wizard. Install Timeless Time & Expense Enterprise Windows. Use the File | Import Single-user File menu item to import each Timeless Time & Expense Personal data file (\*.tls). If needed, reorganize or consolidate your hierarchy. When complete you may uninstall Timeless Time & Expense Enterprise Windows if you only use the web version. Contact us to receive a discount coupon code to upgrade your Personal license to an Enterprise license.
